

BUSINESS PROCESSES & ERP - SAP

INTRODUCTION

In a world where digitalization increases exponentially, ERP and efficient business processes have become the backbone of all sizeable companies. **Two-thirds of Belgian and European companies and organizations employing more than 50 employees use an ERP software package.** Today, companies must rely on robust and stable IT systems reflecting defined, analyzed, clear and optimized processes.

Business processes and ERP have become far more complex and influence competitiveness directly.

Theoretical knowledge is no longer enough. Young university graduates and young professionals need to develop this entirely new skill set. Strong understanding of business processes, best business practices and mastering SAP software has become a must.

Indeed **SAP is the overwhelming leader in the ERP market.**

This program in Business Processes and ERP is specifically designed to help develop these skills and knowledge, and to address these challenges, with a strong focus on SAP. Courses are delivered by senior practitioners and will focus on how companies actually work in practice.

There are currently more than **5,000 vacancies in Belgium for people trained in SAP.**

*Alain Georgy
Managing Director SAP for Belgium
and Luxembourg*

S/4HANA adoption grew to more than 10,900 customers, **up 30% year over year.**

*SAP Quarterly Statement
Q1/2019*

SAP has been a **key part of the digitization** of the business.

*John Allen, Missguided
Fashion Retailer
using SAP Fashion Management*
